

Conference Workshop proposals

The conference workshops will provide highly interactive sessions designed for participants to leave with an outcome which they can take back to their home institution. The workshop discussions will also provide a think-tank setting in which to draw up ideas to improve the current approach to teaching these subjects, and generate ideas which will feed in to the conference recommendations which will be shared with the educational community.

A limited number of these 2 hour workshop slots are available during the conference. The Workshop proposals, if accepted, will be partially supported.

We invite workshop submissions in the following themes.

- New technologies in education
- New methods in education
- Student engagement
- Scholarship of learning and teaching
- Research and career skills
- Assessment of undergraduate education curriculum

Workshop proposals in other areas will also be considered.

Proposals should include the following information:

- Contact details:
 - name(s) of the workshop facilitator(s)
 - Institutional affiliations
